

Topology Seminar at Texas State

When: 12:30-1:50, Friday, September 25, 2020

Where: via Zoom (info and link below the abstract)

Speaker: Dr. Hiro Tanaka

Topic: *Entropy for dg-categories*

ABSTRACT

I began talking about entropy for dg-categories last time. This time, I'll set up a little bit more of the formalism and explore some calculations. The talk will be pitched toward an audience with very little experience dealing with dg-categories, and toward calculations that are as basic (while illustrative) as possible.
