

Topology Seminar at Texas State

**Speaker:** Will Boney

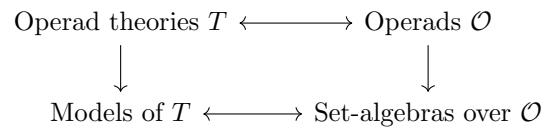

**Title:** A model-theorist's take on operads

**When:** Friday, Apr. 22, 11:00 a.m.– 11:50 a.m.

**Where:** Online. Zoom info at bottom of page.

*Abstract*

Hiro Lee Tanaka has given a series of talks in this seminar on operads, which he described at one point as “[giving] a unifying language for different kinds of algebraic structure.” Model theory provides a different unifying language through syntax (languages and logic) and semantics (structures and models). This talk will provide an introduction to the relevant ideas from model theory, and provide a bridge connecting the operadic viewpoint and model theoretic viewpoint.
